CUTTING | GRINDING | DRILLING

→ TMIC:

TUSK MAJOR INFRASTRUCTURE COMBINATION BLADE

Why have you been paying so much for cheap blades when you could be using a TMIC priced to compete with cheap blades but manufactured to beat them in cutting time and length.

Manufactured on a German designed and built assembly line and using the latest technology in industrial diamonds - this blade CUTS!

Tungsten clearers are positioned to protect the core allowing the 4 different diamonds used to do what they are designed to do - CUT!

- OLD CONCRETE
- EXPANSION JOINTS
- NEW CONCRETE
- ASPHALT

**TMIC makes the cut better,
when other blades just make the cut!**

Product Code:	Product Description:
→ TMIC 310	310 x 3.0 / 2.0 x 12 x 25.4PH
→ TMIC 350	350 x 3.2 / 2.2 x 12 x 25.4PH
